

Award by the Swiss Society of Hypertension 2018

Development of a smartphone app for the better management of hypertension and associated risk factors

Value: CHF 25 000

Aim: To develop an interactive application for smartphones and tablets, which should be dynamic and evolving and help the better treatment and management of high blood pressure. The app is for use by patients.

Information: The expected framework and anticipated possibilities of the app can be checked at www.swisshypertension.ch (grants/research tab).

Deadline for submission: December 31, 2017
